INDUSTRY Hospitality

A new upscale resort in Tahiti was looking to create a splash for its grand opening with travel agents and meeting planners in the U.S.

STORY

The property decided to produce an immersive virtual reality video that enabled viewers to experience its exotic locale in 3-D without actually being there. They chose the **PL-4670 Virtual Reality Glasses** because of its comfortable fit and large imprint area. They shipped the VR headsets, imprinted with the property and App names.

RESULT

62% of the travel agents targeted booked client trips at the resort during the first year. Due to the promotion's success, it resulted in multiple reorders of the 3D glasses.
